Comprehensive, practical, and effective
business continuity training at your own
pace and convenience.

BCKnowledge Pro™ is an innovative computer-based Business Continuity training package designed to teach principles, concepts, and practical methods needed to develop, test, and maintain a business continuity plan and a business continuity program. The objective of BCKnowledge Pro™ is to provide students with practical, detailed understanding and knowledge of Business Continuity and to help students prepare their organizations to deal with potential business disruptions and disaster situations.

Through its interactive capabilities along with quizzes and exercises, BCKnowledge Pro™ provides students an exciting, fun, and practical way of learning Business Continuity. With the help of its unique design and state-of-the-art multimedia learning technology, BCKnowledge Pro™ closely resembles instructor-led Business Continuity courses. Unlike instructor-led Business Continuity courses, BCKnowledge Pro™ allows students to learn at their own pace and on their own schedule.

BCKnowledge Pro™ is designed for all employees at all levels of the organization including general company staff, business continuity practitioners, IT staff, business continuity coordinators, auditors, and senior and executive management. This package is structured in a series of courses that cover an extensive range of topics. The modular structure of BCKnowledge Pro™ gives students the flexibility to take either all courses or only specific courses depending on their training requirements.

BCKnowledge Pro™ includes 8 courses:

- BCK101 Business Continuity Planning 1
- BCK102 Business Continuity Planning 2
- BCK200 Business Continuity Management
- BCK301 Risk Management
- BCK302 Business Impact Analysis
- BCK303 Business Continuity Strategy Development
- BCK304 Business Continuity Plan Development
- BCK305 Business Continuity Plan Testing and Maintenance
